

STATEMENT OF COMMITMENT – FAIR TRADE PRODUCTS

We pledge to our customers that all our products are **“Fair Trade Products”** meaning they were produced and traded under fair conditions and meaning further that

- No child labour is used
- Above average wages are paid
- Medical services are provided
- Human Rights are observed

We deal with family-owned businesses where products are made by hand. These products were designed by **Wagner Life Design**.

For the past ten years, around 200 workers and their families in Pakistan have earned a living from the production of products for which we place the orders. They have enjoyed good working conditions; they earn wages that are around 25% above average for comparable work in Pakistan. Should these workers and/or their families become sick, they receive medical care free of charge. The workers can claim reimbursement of the expenses they spent on their health. Additionally health services have been provided to the miners. Any worker who gets married will receive two months' wages as gift.

The Managing Director of Wagner Life Design GmbH travels to Pakistan to continue the design and development of products and to experience for himself the working conditions that exist in the production area.

Products made and traded under fair conditions – this does mean somewhat higher prices. We cannot but pass on a portion of the additional costs to our customers asking them to accept the higher costs of our **“Fair Trade Products”**.

It is a fact all individuals in the chain of production and trade of Fair Trade Products will benefit from such conditions. We assume that only products made and traded under fair conditions will survive in the market place in the long term.

I hereby certify that all facts in this document are correct.

Hamburg, March 15th, 2016

(Erhard Bürk, Managing Director)
